Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Items (g) and (h) of the claim have claim language within parentheses. This renders the claim indefinite, as it is not clear whether the parenthetical information is being positively recited as part of the claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6, 7, 8, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith. Smith discloses in Figures 10 and 11 and in column 3, lines 37-51 of the specification a device and method for teaching subtraction comprising a set of blocks 20, where each block has graphical representations thereon indicating numbers. One block is adapted to be placed over another, such that the number of graphical representations visible corresponds to the solution to the problem. The blocks are not cards or tiles, but using cards or tiles in a similar manner is considered to be an

Art Unit: 3714

obvious variation on the disclosure of Smith. With respect to claim 6, the covering block comprises a completely opaque covering, thus reading on (k). With respect to claim 7, both dots and numbers are disclosed by Smith.

Allowable Subject Matter

Claims 2-5 and 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The claims recite that a user can look through the tile to view graphical representations on the underlying card, via transparency or windows. As Smith discloses blocks of varying sizes, there is no suggestion or motivation to provide a tile which can be seen through to look at the card. As a result, the claims contain allowable subject matter.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mulholland, Walker, Frieman, -Greenberg, Moody, Carl, Faudree, Karabaic and Bigold disclose various devices and methods of teaching math concepts.
